## (54) COMPOSITE PRINTER

### (57) Abstract:

**PURPOSE:** To allow the printer to send print data received from a host as facsimile data with an inexpensive configuration while no trouble is caused without the need for the provision for plural printer languages by the host and the printer.

**CONSTITUTION:** Upon the receipt of a command (a) selecting a start/end control printer language, a start control command (b), a command (c) selecting a printing printer language, print data (d), a command (e) selecting the start/end control printer language, and an end control command (f) from a host, the printer selects a required printer language to interpret a breakoff of the print data (d), allows a printer language processing program to analyze the print data (d) and forms an image in a frame memory 7, the image is stored in an auxiliary memory 9 and sent to a destination via a FAX communication control section 8.
